# GYGY
# FIVE O, SECTOR 50 NOIDA

Here's a complete, no-nonsense brief on **GYGY FIVEO (a.k.a. "Five O")**, Sector 50, Noida:

## ❖ Snapshot

- **Type:** High-street retail + dining (shops, showrooms, food court).
- **Developer:** GYGY Developers Pvt. Ltd. (CIN in brochure).
- **Exact site (from brochure):** Plot No. 1B, Block F, Sector-50, Noida – 201303.
- **RERA: UPRERAPRJ662072/10/2024** (registered name: "FIVEO"). Verify on UP-RERA. (Noida Spaces)
- **Land size: ~0.74–0.75 acres** (third-party portal figures). (mores.in)
- **Structure:** Multiple retail floors (LG, G, 1, 2) + food court; basement parking levels shown in plans.

---

## ❖ Pricing (as per official brochure)

- **Lower Ground:** ₹45,000/sq ft
- **Ground:** ₹50,000/sq ft
- **First:** ₹36,000/sq ft
- **Food Court (Second Floor):** Dine-in ₹20,000/sq ft, Food Court kiosks ₹10,000/sq ft
- **PLC:** Road 10% | Plaza/Garden 10% | Corner 5%
- **Other charges:** EEC/FFC/IFMS **₹600/sq ft**; **Power backup** 1 KVA @ ₹30,000 (4 KVA for LGF/GF; 2 KVA for 1st/2nd); **Car parking ₹5 lakh (optional)**; **Lease rent at actuals**; GST & govt. taxes extra.
- **Payment plan:** 50% at booking → 25% at super-structure → balance 25% + charges on offer of possession. (Scribd)

*Note: Several portals advertise ticket sizes from ~₹36 L to ₹1.5 Cr+ depending on unit size and level; always reconcile with the current builder price sheet + RERA. (mores.in, 99acres, MagicBricks)

---

## ❖ Unit mix & sizes (indicative)

- Small high-street shops start **~119 sq ft**; larger showrooms run into several hundred–thousand sq ft (varies by floor). Examples on portals: **119–674+ sq ft** saleable ranges. (99acres, mores.in)
- Floor plans in brochure show **Basement-1, Ground, First, Second, Third, Fourth** layouts with retail corridors, toilets, staircases, etc.

---

## ❖ Amenities & Specifications (from brochure)

- **Italian marble flooring** (premium finishes in common areas).
- **Centralized/fully air-conditioned shops**, **high-speed elevators**, **uninterrupted power**, **24×7 security/CCTV**, **fire safety & sprinklers**, **Wi-Fi-enabled project**, **facility management**, **multi-level car parking**.

---

## ❖ Location & Connectivity

- In the **heart of Sector 50**, a dense, affluent residential catchment (brochure cites **12,000+ families**).
- **Metro:** Close to **Sec-52 (Blue Line)** & **Sec-51 (Aqua Line)** interchange.
- **Roads:** Access to **Noida Expressway** & **Yamuna Expressway**; proximity to Dadri Road/NH-24 via city grid (per portals).
- **Hospitals/landmarks:** ~2 mins to **Medanta**; near the **upcoming IKEA** (as per brochure highlight).
- **Airports:** ~1 hr to **IGI**, ~45 mins to **Jewar** (brochure). Actual time depends on traffic.

---

## ❖ Approvals & Compliance

- **UP-RERA registered** (ID above). Always cross-check sanctioned **building plans, land title, and any leases** on UP-RERA before booking.

## ❖ Timelines / Possession

- **Under construction.** Brochure doesn't state a possession date. Third-party listings mention **Aug 2027 to Aug 2029** on specific inventory—treat these as indicative only; confirm the committed possession on the **RERA quarterly updates** and in your **Agreement for Sale**. (MagicBricks, 99acres)

---

## ❖ Investment notes (practical)

- **Ticket size & yields:** With brochure rates of ₹36k–₹45k/sq ft (shops) and ₹10k–₹20k/sq ft (food court dine-in/kiosks), entry tickets can range widely based on area and PLCs. Rental yield depends on **tenant mix & footfall**; verify **lease guarantees** or **assured returns** if offered (often promoted via ads), and read offer T&Cs carefully. (Scribd, Facebook)
- **Catchment strength:** Dense residential (Sector 50/51/41/76 belt) + dual-metro interchange can support **all-day footfall** for F&B, daily-need retail, clinics, and boutique formats.
- **Risk checks:** Demand confirmed **allotment letter**, **latest construction photos**, **demand notes tied to RERA-linked milestones**, and **escrow compliance** before large payments.

---

## ❖ What to verify next (before booking)

1. **Current inventory, exact unit size (carpet/super), frontage, and ceiling height** for your shortlisted shop.
2. **Updated price list & payment plan** (brochure vs live offers sometimes differ).
3. **Possession timeline & penalty clauses** as filed on RERA.
4. **CAM/maintenance estimates** post-handover and **parking allocation** (brochure shows optional paid parking).
5. **Any anchor/ signed MOUs** for the food court or key brands (drives footfall).

---

## ❖ Quick facts (anchor points)

- Project: **GYGY FIVEO (FIVEO)** — commercial retail + food-court development in Sector-50, Noida. (gygygroup.com, d3ai7zxpseytqr.cloudfront.net)
- UP-RERA registration and official brochure / price-list are published by the developer — always verify latest RERA listing before booking. (Scribd, d3ai7zxpseytqr.cloudfront.net)
- Typical unit sizes seen on portals: **~119 sq ft up to ~1,645 sq ft** (small shops to large showrooms). Resale listings show entry ticket sizes from roughly **₹1.2–1.5 Cr** upwards depending on size & floor. (Aum Sky, MagicBricks)

---

## ❖ Floor-by-floor investment map — what each floor *actually* means for investors

### 1. Lower Ground Floor (LGF) — "value entry, operational/stock-friendly"

- **Typical use:** Back-of-house, storage + smaller retail formats, bulk/discount stores, hypermarket support.
- **Visibility & footfall:** Lower than street level; strong if the mall design funnels footfall from entrances and parking. Good for price-sensitive retail and inventory-heavy tenants. (d3ai7zxpseytqr.cloudfront.net)
- **Price / cost drivers:** LGF often carries PLCs for frontage and parking; power & higher KVA requirements may apply. Check EEC/IFMS charges. (Scribd)
- **Investment take:** Lower entry price than GF; slower walk-in but lower rents — good for investors seeking lower ticket-size and longer-term capital appreciation rather than immediate high rent.

### 2. Ground Floor (GF) — "prime high-visibility retail"

- **Typical use:** Flagship stores, premium boutiques, banks, flagship F&B with dine-in, salons.
- **Visibility & footfall: Highest** — best frontage, direct street access and main corridors. Highest walk-in, highest conversion. (d3ai7zxpseytqr.cloudfront.net)
- **Price:** Brochure/price-lists show GF among the costliest slabs (developer quoted higher rate for ground/front units). Confirm current PLCs & corner premiums. (Scribd)

- **Investment take:** Best for rental income and brand tenants; highest ticket-size and competition. Ideal if you need fast leasing and stable footfall.

### 3. First Floor — "balanced: cheaper than GF, solid footfall"

- **Typical use:** Apparel stores, showrooms, specialty retail, clinics, service outlets.
- **Visibility & footfall:** Good — if vertical circulation (escalators/elevators) is well-placed; often receives steady afternoon-evening traffic. Price per sq ft on brochure is lower than GF. (Scribd)
- **Investment take:** Best compromise between ticket size and rental prospects. Attractive for investors who want lower price than GF but decent leasing prospects.

### 4. Second Floor / Food Court Level — "dine + entertain / high dwell time"

- **Typical use:** F&B dine-in, kiosks, quick-service restaurants, experiential outlets. Food-court kiosks often have smaller footprints.
- **Pricing specifics:** Developer price-list separates **Food-Court Dine-in** and **kiosks** (the brochure shows special rates for food court area). Check the published price slabs. (Scribd)
- **Footfall & revenue model:** Food court drives **dwell time** (people stay longer), boosting the whole complex's footfall. However, F&B has higher operating costs (exhaust, kitchen, power) and often higher CAM/utility needs.
- **Investment take:** If the project secures anchor F&B brands, food court units can give strong rental demand — but only if the developer has a solid tenant-mix plan or MOUs.

### 5. Upper Floors / Mezzanine / Terrace — "specialty & lower-cost options"

- **Typical use:** Offices, studios, large-format showrooms, experiential centers, event spaces.
- **Visibility & footfall:** Lower than GF/1F; depends on tenant type (appointments, deliveries).
- **Investment take:** Good for niches (training centres, studios) where street-walk-in isn't critical.

---

## ❖ Typical unit sizes & price examples (market snapshot)

- **Small shop: ~119 sq ft** — commonly listed as the minimum unit. Brokerage/resale listings show such small units with ticket sizes starting around **₹1.2–1.5 Cr** depending on rate & floor. (Aum Sky, MagicBricks)
- **Mid-size showroom: 300–600 sq ft** — common for apparel, salon chains, F&B kiosks. Resale examples list shops of 300–440 sqft at ₹1.0–1.4 Cr. (MagicBricks, 99acres)
- **Large showroom:** 1,000+ sq ft — premium frontage, higher-ticket buyers; portal listings show up to ~1,645 sq ft. (99acres)

(Exact carpet/saleable measurements vary — developer uses super-area/saleable area conventions. Always request a *detailed area break-up (carpet vs super vs built-up)*.)

---

## ❖ Cost add-ons & recurring charges you must budget for

- **EEC / FFC / IFMS**: brochure lists an **other charges** slab (example figure shown ≈ **₹600 / sq.ft** in brochure snapshots). (Scribd)
- **Power backup / KVA charges:** developer specifies KVA slabs and one-time KVA charges in the price-list (example: one-time KVA booking fees). Confirm exact KVA allocation & cost. (Scribd)
- **Parking:** usually an optional paid slot (check the price in the builder price-sheet & resale listings). (99acres)
- **GST, stamp duty, registration** — payable extra at booking/registration.
- **CAM / maintenance post-handover** — confirm the developer's estimated CAM (per sq ft per month) in the agreement.

---

## ❖ Leasing & rental potential — practical view (what to expect)

- **GF:** fastest to lease; brand premium; shorter vacancy cycles if pricing is competitive. (d3ai7zxpseytqr.cloudfront.net)
- **1F & Food Court:** good leasing if developer locks anchor brands / food operators; food court elevates entire center's footfall. (d3ai7zxpseytqr.cloudfront.net, Scribd)
- **LGF / upper floors:** longer vacancy cycles unless used by price-sensitive big-box tenants or back-of-house services.

- **Key levers for rental success:** frontage, access to escalators/entrances, tenant mix (anchor + daily-need stores), parking availability, and developer-backed marketing/lease roll-out.

---

## ❖ Risks & red flags to check before committing

1. **Confirm RERA details** (project stage, sanctioned possession date, penal clauses). Use the UP-RERA number from the brochure. (Scribd)
2. **Ask for signed MOUs / anchor tenant list** — food courts succeed only if busy brands or curated F&B mix are locked in. (d3ai7zxpseytqr.cloudfront.net)
3. **Compare brochure price-list vs live resale offers** (resale prices sometimes include negotiated discounts or may reflect market distress). (99acres)
4. **Get latest construction photos & site visit** — verify vertical progress and parking access.
5. **Check exact unit frontage, ceiling height & service access** — these materially affect retail usability and rentability.

---

## ❖ Ready-made quick calculations (examples you can reuse)

- Use the developer price per sq.ft (from price-list) × unit super-area → **base price**.
- Add EEC/FFC/IFMS (developer slab e.g., ₹600/sq.ft) → **other charges**.
- Add one-time KVA booking (if required) + parking (if you buy).
- Add GST & registration separately.
  (If you want, give me one exact unit size & floor and I'll compute a line-by-line cost estimate for that unit.)

Sources used for figures and claims above: official project pages & brochure, developer price-list and current market listings. (d3ai7zxpseytqr.cloudfront.net, Scribd, 99acres, MagicBricks)
